## SUMMARY

Junior Web Developer. Highly dependable and motivated with an adaptive work style. Seeking opportunity to improve my web development and web design skills.

## SKILLS

HTML5, CSS3, SASS/Less, React, Redux, Node, Express, Jest, SQL, JWT, OAuth, REST, JavaScript, Python

## PROJECTS

**React Pokedex**                                                      Mar. 2020 - Mar. 2020

A fun personal project that pulls in JSON data from the PokeAPI to render a Pokedex look-a-like. Front end is built using React.js, React-Router, and Axios and styled using Styled-Components and Bootstrap.

**Endrsd**                                                              July 2019 - Sept. 2019

A capstone project built as a centralized location for Lambda School students to access track-specific career endorsement requirements, as well as provide students with a fun and engaging way to track their career endorsement progress.
Front end is built using React.js, React Hooks, and Redux. Back end is built using PostgreSQL, Node.js, Express.js, and Knex.js.

**Bubl**                                                                May 2019 - May 2019

An application that seeks to assist elementary children transitioning to middle school by creating a social platform students can meet their classmates. This helps them make friends and expand their social bubble before classes even begin.
Front end is built using React.js and Redux. Back end is built using PostgreSQL, Node.js, and Express.js.

## EDUCATION

**University of South Alabama**                                          May 2015 - Current

Bachelor's Degree in History 2021

**Lambda School**                                                       Apr. 2019 - Jan. 2020

A 9+ month Computer Science & Software Engineering Academy providing immersive hands-on curriculum with a focus on computer science, web development, and web design.

## EMPLOYMENT

**Hancock Whitney Bank**, *Teller*, Mobile, Alabama                      May 2016 - Sept. 2017

Retained positive customer feedback while properly handling transactions according to procedure
Helped coworkers with computer related difficulties such as repairing and answering questions
Proficiently and professionally executed tasks during busy periods
Exercised notable discretion with transaction inquiries and issues
